more than law

NEW ADVISORY TEAM FOR THE ENERGY SECTOR

Our new team members who will join forces with Partner Paweł Grzejszczak, a leading expert in legal advice to the energy sector:

Rafał Hajduk | Partner

Specialist in transaction advice and legal services to businesses in the energy sector. Handles all types of project in the energy sector, e.g. advice on investments in constructing or upgrading energy infrastructure, particularly power generation capacity, on project finance, mergers and acquisitions, joint ventures and on trading in energy, fuels, greenhouse gas emission allowances and related derivatives. Rafał advises on regulatory and contractual matters.

Paweł Grzejszczak | Partner

Specialist in energy law, project finance transactions, mergers and acquisitions and restructuring projects. Advises clients in the energy, heating, fuel and gas sectors on all aspects of energy operations, mainly on regulatory and transactional issues. Expert in cogeneration and renewable energy investments. Handles large M&A transactions in Poland.

Grzegorz Filipowicz | Senior Associate

Specialist in energy law, environmental law and investment regulations. He focuses mainly on energy regulations in the construction process (administrative proceedings) and environmental impact assessments. He also advises on geological and mining law, waste and sewage management issues and liability for environmental damage.

Anna Maria Konopka | Associate

Specialist in investment and real estate processes in energy projects. Experienced in due diligences, particularly of legal title to real estate, construction process and corporate and contractual issues. Also handles administrative proceedings to issue building permits.

Natalia Jankowska | Associate

Specialist in regulatory issues on the energy market, energy sector transactions and state aid and competition law matters.

Mateusz Koszel | Associate

Specialist in regulatory aspects of the energy sector and supports energy infrastructure investments. Involved in due diligences of conventional power plant, RES and distribution infrastructure projects.

OUR ADVICE

In conjunction with business, finance, tax and technical advisers, we have been handling key multidisciplinary projects for the energy sector for many years.

We provide full-range advice to entities in the conventional, nuclear and renewable energy sector, to cogeneration and heating companies and entities in the gas and liquid fuels sector, including leading domestic and international energy concerns.

We offer:

- full-range legal support in new and modernisation investments (construction of heating units, renewable sources, network investments); we have also been involved in advising on a project in the Polish nuclear programme,
- full-range regulatory advice, primarily in concession, tariff, litigation and other proceedings before the President of the Energy Regulatory Office, the Material Reserves Agency, the Agricultural Market Agency, the Minister of the Economy, the Minister of the Environment and other regulatory authorities,
- advice on matters of EU law, e.g. directives on the energy market and state aid for energy projects, REMIT, MiFID, MiFID 2, MiFIR and EMIR,
- contractual and regulatory advice on gas and energy trading, including cross-border trade,
- legal due diligences of energy projects,
- legal assistance with drawing up, negotiating and implementing contracts for the sale, transmission and distribution of fuels and energy, network interconnection contracts, gas and fuel storage contracts, ticket and tolling agreements, and also the trade in emission allowances and rights under certificates of origin,
- restructuring advice for energy companies,
- advice on securing contractual positions in various transactions,
- support with M&A transactions.
