Invitation**

Future of Polish renewables

Polish renewables are coming back! Poland has just made improvements to its support system and auctions for up to 2.5 GW of onshore wind and 750 MW of PV are planned for later this year. At the same time, development of up to 10 GW in off-shore wind is taking off.

Please join us for a discussion of the current Polish regulatory regime for renewables.

Speakers

Rafał Hajduk
Partner

rafal.hajduk@dzp.pl

Head of the energy advisory team. He handles all types of projects in the energy sector and advises on, e.g. investments in energy infrastructure, particularly power plants, project finance, mergers and acquisitions, joint ventures, and trading in energy, fuels, greenhouse gas emission allowances and related derivatives. Also advises on regulatory and contractual matters. Official Polish legal counsel to EFET.

Grzegorz Filipowicz
Senior Associate

grzegorz.filipowicz@dzp.pl

Specialist in energy law, environmental law and investment regulations. He focuses particularly on provisions on supporting renewable energy sources, concession issues, and legal issues in projects from the perspective of energy regulations in the construction process (administrative proceedings).

Time: 6 November 2019, 14.00-16.00 a.m. CET

REGISTRATION: by 4 November 2019, [click here](#)
